

## **Melet Platics – Project Leader**

For over 50 years, Melet Plastics has been a go-to supplier for many of North America's leading manufacturers that require a complete part manufacturing solution. Melet provides an array of services including part design and engineering, prototyping, injection molding, and mold manufacturing.

We offer an attractive salary and benefits package with a very friendly and relaxed work environment. It is an exciting time to join Melet Plastics. We recently expanded our facility in Winnipeg to allow for growth into new products and markets. We require an enthusiastic and dedicated teammate to help us realize our strategic goals. Come and see what Melet has to offer you and your future!

We are seeking creative, mechanically inclined, intelligent people to help our experienced team tackle problems big and small. Our company thrives on taking on complicated and challenging projects. As a Melet employee, you get to be on the ground level of innovation – producing new products to launch new technologies in a wide variety of industries.

As a Project Leader, you will manage new product development projects from start to finish, including the following responsibilities:

- Meet with customers to discuss new opportunities
- Optimize product designs (DFM)
- Research and select appropriate materials for intended application
- Coordinate cost estimating process
- Develop project schedule and track progress from start to finish
- Liaison with customers and suppliers
- Validate and launch new products into production

- Optimize and document production processes

- Research and development projects

Ideal candidates will have the following qualifications:

- Bachelor of Science in Engineering or Engineering Technologist degree

- Project management experience

- Strong mechanical aptitude

- General knowledge of plastics, manufacturing, and tooling

- Mechanical design and development skills using 3D CAD

- Good communication skills
