Public City Architecture Inc.

11-600 Clifton St.

Winnipeg, MB R3G 2X6

Contact: peter@publiccityarchitecture.com

### **POSITION SUMMARY**

PUBLIC CITY ARCHITECTURE is eager to fill the following full-time position for Architectural Production Technician. We are an award-winning design led architecture, landscape architecture, urban design, and public art practice based in Winnipeg with a studio in Toronto. We offer a varied and challenging workload and value a healthy work life balance, a disciplined and careful approach to our work, and joyful work culture. We have active projects in design, production, and construction in Winnipeg, Edmonton, Calgary, and Toronto as well as across Manitoba. The successful candidate will demonstrate preparedness to work fluidly between architecture and landscape architecture, site and building.

Qualifications: - Those with a minimum 4 years of related experience in a structural or civil engineering firm or an architecture or landscape architecture firm are encouraged to apply. Experience with Autodesk Revit and/or VectorWorks is preferred. Strong problem-solving skills, focussed attention to detail, drawing consistency, and careful attention to coordination are highly valued at Public City. Strong general computer skills and demonstrating an ability to learn new software skills at elevated levels is extremely important to this position. As well, those candidates who demonstrate self-motivation, strong interpersonal skills, and the ability to manage multiple priorities related to external and internal deadlines are encouraged to contact us. Demonstrated experience in construction is important. Individuals who are registered or eligible to be registered as a C.E.T or C.Tech with Certified Technicians and Technologists Association of Manitoba (CTTAM) will be given priority. This position remains open until filled.

Key Responsibilities: Technical Detailing and the production of efficient comprehensive contract document drawings. Interpretive detailing and the ability to read into to sketches and problem solve through detail drawing explorations. Building Information modelling and digital discipline coordination is critical knowledge that you are willing to continue investing in as software and industry standards evolve. The ability to read, comprehend, and coordinate project information with other design disciplines as well as internal team members is important as is working co-operatively under the direction of Project Architects, Landscape Architect and Principals. Fluency in the National Energy Code for Buildings and the Manitoba Building Code will be a key responsibility as is an ease of implementing and adapting standard building detail practices to new problems and contexts.

Job Type: Full-time with access to group benefits; casual dress code; comfort with dogs in the workplace; participation in studio events. Monday to Friday 8:30 to 5:30 with half hour lunch and two 15-minute breaks, or the equivalent thereof.

Work Location: In person, Winnipeg studio.
