About us

DTI specializes in electrical and electronic devices for surface and underground mining, agriculture, construction, and other heavy duty industrial applications.

DTI designs, manufactures, and distributes products globally

Mechanical Engineer

Successful candidate will become a part of our engineering team. Fast pace environment, creative and dynamic work atmosphere essential for success of our growing company. Interesting projects, exciting applications, hands-on experience.

Mechanical Engineer Duties and Responsibilities:

- Designs mechanical and electromechanical products and systems by developing and testing specifications and methods.

- Evaluates mechanical and electromechanical systems and products by designing and conducting research programs and applying principles of mechanics, heat transfer, and materials.
- Develops mechanical and electromechanical products by studying customer requirements; researching and testing manufacturing and assembly methods and materials; and soliciting observations from operators.
- Develops manufacturing processes by designing and modifying equipment for fabricating, building, assembling, and installing components.
- Assures system and product quality by designing testing methods; testing finished-product and system capabilities; and confirming fabrication, assembly, and installation processes.
- Prepares product reports by collecting, analyzing, and summarizing information and trends.
- Provides engineering information by answering questions and requests.
- Maintains product and company reputation by complying with government regulations.
- Maintains system and product data base by writing and entering data.
- Completes projects by training and guiding technicians.
- Maintains professional and technical knowledge.
- Contributes to team effort by accomplishing related results as needed.

This is a full-time position. We conduct our work from the office environment. Hourly pay will range between \$20 to \$30 per hour depending of presented experience and quality of work.
