- Leads the electrical aspects of projects including load calculations, distribution upgrades for commercial buildings. This entails both delegating project design tasks and performing design task (depending on project size).

- Manage projects and deadlines while keeping the electrical engineer of record and department manager well informed of project status.
- Prepare construction documents (drawings and specifications).
- Write specifications, schedules, budgets, technical reports and control schedules.
- Perform onsite reviews, contract administration
- Attend meeting with clients, other consultants and contractors
- Prepare design calculations and review plans for compliance with client requirements, guidelines, codes and other regulations.
- Perform condition assessments for existing building systems and write reports
- Perform relevant design tasks and site review of electrical building systems.
- Provide guidance and mentoring to junior technical staff.

#### Qualifications:

- 5 to 10 years of relevant experience in the design of building electrical systems.
- Registration as a C.E.T., Ctech with CTTAM or P. Eng with Engineers Geoscientists Manitoba.
- Experience in AutoCAD and MS Office
- Experience in Revit is not required but valued
- Ability to obtain Government of Canada Security Clearance
- Travel required; 1-3 days per month on average with overnight stays in other provinces.
- Driver's License preferred
- Good initiative, attentive to details, ability to work independently and as part of a team.
- Excellent verbal and written communication skills.

Salary commensurate with experience, HDK consulting offers a full health and dental package.

We appreciate your interest in this opportunity, however only those selected for an interview will be contacted.
