Full job description

JUNIOR MANUFACTURING ENGINEER

COMPANY DESCRIPTION

Yakta is seeking a passionate and driven Junior Manufacturing Engineer to join our dynamic team. The Junior Manufacturing Engineer will play a crucial role in optimizing production

processes, improving efficiency, and ensuring the highest quality standards for our zero turn lawnmowers.

JOB DESCRIPTION

Reporting directly to the Senior Manufacturing Engineer, the Junior ME works closely with and supports the production team by providing technical support on issues related to the mower build. JME will assist production with the first and subsequent builds of new systems; prepare proposed design changes or revisions and assist with accuracy audits and root cause analysis, as well as participate in continuous improvement.

RESPONSIBILITIES

- **Process Optimization:** Collaborate with senior engineers to analyze manufacturing processes and identify areas for improvement in efficiency, productivity, and cost-effectiveness.
- **Quality Assurance:** Assist in implementing quality control measures to ensure adherence to product specifications and standards throughout the manufacturing process.
- **New Product Development:** Participate in cross-functional teams to support the development and introduction of new zero turn lawnmower models, from concept to production.
- **Continuous Improvement:** Propose and implement innovative solutions to enhance manufacturing processes, reduce waste, and increase overall operational efficiency.
- **Documentation and Reporting:** Maintain accurate records of engineering changes, process improvements, and quality control procedures. Generate reports to track key performance indicators and provide regular updates to management.
- **Supplier Collaboration:** Work closely with suppliers to evaluate component quality, troubleshoot manufacturing issues, and drive improvements in supplier performance.
- **Training and Development:** Stay informed about industry trends, best practices, and emerging technologies in manufacturing engineering. Participate in training programs to enhance technical skills and knowledge.

QUALIFICATIONS

- 1-3 years of relevant experience.
- Certified Mechanical/Manufacturing/ Industrial Engineer or Engineering Technologist or acceptable equivalent of education and/or experience.
- One to five-year experience in a manufacturing setting preferable in motorized equipment.
- English language fluency (read, write, speak and understand).
- Ability to read and understand engineering drawings and documentation (e.g. blue prints).
- Self-motivated with ability to work with minimal supervision and process oriented.
- Computer skills: typing, ability to use of Microsoft Office and Windows, etc.
- Experience with AutoCAD or CAD/CAM software is a plus.

- Strong communication and interpersonal skills, including experience working with people in a manufacturing environment.

Additional Requirements

- Embrace Yakta's core values of FAIR, AGILE, and TOGETHER.
- Detail-oriented with a focus on accuracy and efficiency.
- Ability to work in a fast-paced and dynamic environment.
- Willingness to work flexible hours as needed.

BENEFITS

- Competitive salary & comprehensive benefits package
- Opportunity for professional growth & development
- Collaborative and innovative work environment
- Recognition for outstanding performance & contributions

If you are a passionate and results-driven Junior Manufacturing Engineer looking to make a significant impact in a dynamic and growing company, we invite you to apply for this exciting opportunity. Join us in shaping the future of outdoor power equipment manufacturing! Apply now by submitting your resume to **hr@yakta.com** be considered for this position.
