Position Posting – Industrial Hygiene Technologist

Winnipeg Air Testing, a growing health and safety consulting firm, is seeking an Industrial Hygiene Technologist. Industrial Hygiene is the science-based profession that tests for the presence and concentrations of worker exposures to chemical, metals, etc. The work involves going into a wide range of workplaces and helping companies measure and control workplace exposures to ensure the health of workers. Typical examples include measuring a welder's exposure to metals fumes and helping the company better control that exposure with the use of ventilation or personal protective equipment.

The ideal candidate will serve as part of a team of health and safety professionals. Duties include conducting industrial hygiene services including air monitoring and bulk sampling for hazardous substances, performing noise exposure surveys and preparing reports. The candidate should be responsible and adaptable to varying work environments and possess a strong pro-active work ethic. They should work well in a team environment and possess excellent communication skills.

This is an entry position and training on all aspects of the job will be provided.

Major Responsibilities

- Conducting field work for industrial hygiene monitoring (air sampling, noise dosimetry, etc.) and indoor air quality investigations
- Preparing sampling reports using standard templates
- Office work such as calibrating sampling pumps, obtaining media, submitting samples for laboratory analysis, collecting relevant data, and documenting field work.

Knowledge and Education

- University Degree in the Sciences or Technical Diploma in Sciences or Environmental Studies is preferred.
- Eligibility for certification with CTTAM is considered an asset.

Work Experience

- Experience in the field of Safety and Health or Industrial Hygiene is an asset
- Experience working in a manufacturing setting is an asset

Skills and Competencies

- Ability to learn quickly in a multi-task environment, while meeting client needs and deadlines
- Critical thinking, problem-solving skills and adaptability
- Must have very good English communication skills, both written and oral
- Must be comfortable with numbers.
- Proficiency with Microsoft Office products such as Word, Excel, Outlook is required
- Strong client interfacing and customer service skills
- Ability to work with minimum supervision with close attention to detail

Work Environment

- The job is a mixture of office and field work that occurs in a variety of different industrial environments.
- Applicants must have a valid driver's license and reliable personal vehicle. A mileage allowance for use of personal vehicle is provided.

- At times work is required outside of the normal work hours.
- Some work is performed out of town.

Schedule

- 8:30 a.m. to 4:30 p.m. Monday to Friday

Salary Range: $54,000 - $78,000 per annum

Benefits

- Benefits package including 3 weeks paid vacation per year
- In addition to vacation time, paid time off between Christmas and New Years
- Opportunity for professional growth and development
- Collaborative and innovative work environment

Application Deadline: November 20, 2026
